

SUCCESS

2006 © Gudrun Wang

SUCCESS is sometimes doing what is not so much fun

SUCCESS is to do the right thing at the right moment

SUCCESS is to be happy with what you do

The more people you make happy the more SUCCESS you experience

SUCCESS is – when everything you do, say or decide leads to the advancement and prosperity of all concerned

SUCCESS happens when a decision has been made

You cannot fail – you can only fail to accept your own SUCCESS

SUCCESS starts with you – not circumstances

There must be the intention to experience SUCCESS

The more you concentrate on what you have to do the less you care if SUCCESS is happening

The more you love what you do the less you care about SUCCESS

Dying people don't look back to see how much SUCCESS they had in their life but how much love.

SUCCESS equals intention plus commitment

Focus on giving your best and SUCCESS will follow

If SUCCESS means nothing to you, perhaps you mean nothing to yourself

SUCCESS is a process, not a goal to arrive at

Do you fear SUCCESS? Then you fear your powerful self

People who experience true SUCCESS experience fulfillment

The joy of SUCCESS is the joy of living

If you have not yet experienced SUCCESS, you have not experienced giving

If you are not experiencing SUCCESS you are not giving the gifts that you have

Perseverance leads to SUCCESS and not vice versa

SUCCESS means you know you can do it – even if others don't know it

When you believe in yourself you are on the road to SUCCESS – no matter how long

Having the courage to follow your dreams means accepting SUCCESS as your fate

Your SUCCESS is not up to others, it is up to you

SUCCESS means nothing if you are a loner
